

Claiborne Street - Concrete Pavement Panel Replacement

March 9, 2012 -- Progressive Construction Company has begun work on replacement of concrete paving panels on Claiborne Street as of Monday, March 5th, 2012. This work is a portion of a project that rehabilitates Six (6) Pineville streets with the others being East and West Shamrock Streets, Bragg Street, Donahue Ferry Road, and Jefferson Highway.

The work will consist of concrete paving panel replacements on Claiborne Street and asphaltic concrete overlay of East and West Shamrock Streets (from Melrose to the entrance of Central Hospital), Donahue Ferry Road (from Expressway Overpass to Edgewood Drive), Jefferson Highway (from Military Hwy. to Hwy. 165) and Bragg Street. It is anticipated that the work will take approximately (5) five months to complete.

Claiborne Street will be closed to thru traffic beginning Monday March 5th between Military Highway and Henry Street for approximately three weeks. Alternate routes to the open portions of Claiborne Street will be by Fairmont Street and Lallah Streets. After the closed portion of Claiborne Street is reopened there will be areas with one lane traffic until approximately the end of June 2012. Interested persons can keep updated on the location of the work areas by utilizing this web site as well as the Pineville High School Web Site.
